AIR TRANSPORT AVIONICS CONTENT AGREEMENT, SUBSCRIPTION SERVICE LICENSE AND SUPPORT

1. TERRAIN AWARENESS and WARNING SYSTEM (TAWS) DATABASE(S)

The database(s) have been developed to meet the need for current aviation information in the Boeing 787 Integrated Surveillance System (ISS) in a computer compatible form required for modern aircraft equipment used under instrument and visual flight conditions. The database(s) are designed for use by experienced and knowledgeable pilots who must be thoroughly familiar with and competent in the navigation of aircraft and the ISS equipment being used. Certain navigation and other databases incorporate procedures that require specific aircraft and aircrew approvals by relevant national aviation authorities. These procedures must not be utilized unless the operator has obtained all applicable national aviation authority approvals for the aircraft and aircrew.

Many databases are compiled in accordance with the industry recommended standard for aeronautical data, Aeronautical Radio, Inc. Specification 424, Navigation System Data Base (ARINC 424), or other similar industry and/or supplier specifications which are supplemental to the ARINC 424, as applicable. The databases may not contain all navigation data or relevant descriptions of surrounding terrain and/or obstacles existing worldwide and Buyer should make no assumptions otherwise. Buyer's databases may contain only a subset of the available data. The databases may not contain all information necessary to independently conduct instrument or visual flight procedures.

2. TERM AND TERMINATION.

The term of this Agreement shall commence on the date executed below and continue for an initial period of one (1) year unless earlier terminated in accordance with this Agreement. Thereafter, this Agreement shall automatically renew for successive one (1) year periods.

(A) Buyer may terminate this Agreement for convenience with written notice thirty (30) days prior to the anniversary date of the renewal at no additional cost to Buyer. (B) Should Buyer terminate the Agreement for convenience at any time other than provided in Section 2(A) and Section 2(C), Buyer shall not receive any monies in a refund and/or credit for any unused portion of the cancelled subscription. (C) Either Rockwell Collins or Buyer can terminate this Agreement should any party materially fail to perform or observe any covenant, condition or agreement to be performed or observed and such failure is not corrected or diligently prosecuted within thirty (30) days after written notice thereof. (D) Upon termination of this Agreement for any reason and at any time whatsoever, the licenses granted shall immediately terminate and Buyer shall cease to have any rights or licenses whatsoever to use the Databases.

Loading of the database(s) into the Rockwell Collins equipment constitutes Buyer's acceptance to the terms and conditions of this agreement.

3. LICENSE GRANT.

Rockwell Collins grants to Buyer a term, worldwide, nonexclusive, nontransferable license to use the database(s) solely in or with Rockwell Collins equipment installed on the Boeing 787 platform. The right to use these databases is granted on an enterprise basis and requires a separate, individual subscription for each fleet of aircraft. Buyer agrees not to rent, lease, lend, sell, redistribute, sublicense, copy, transfer, modify, disassemble, or reverse engineer the database or to permit others to do so.

At the beginning of each database subscription service Buyer is required to register with Rockwell Collins all of the Boeing 787 aircraft in its possession and/or under its control.

Buyer is permitted to: (i) load the database onto an aircraft containing compatible Rockwell Collins equipment including multiple equipment sets, (ii) load the database onto multiple Boeing 787 aircraft owned or otherwise controlled by Buyer, including additional aircraft those aircraft acquired or otherwise in Buyers possession during the performance of the subscription service, (iii) load the database onto compatible Rockwell Collins equipment used for spare or replacement, (iv) load the database onto compatible test equipment used to support Boeing 787 platform maintenance.

Buyer agrees not to upload to or host on any website or server except for the specific purpose of supporting maintenance activity for the Boeing 787 and/or related Rockwell Collins equipment.

The databases shall remain the sole and exclusive property of Rockwell Collins or Rockwell Collins content providers. Except for the limited license rights expressly set forth in this Agreement, Rockwell Collins and its content suppliers reserve all rights in and to the Databases and Documentation including title, ownership, and intellectual property rights.
