

Date: 15 August 2023
Subject: ISS-2100 TAWS Database
Impacted: 787 TAWS operators
Databases: 636 and later

Dear Valued Customers,

Collins and Honeywell have reached an agreement that the TAWS database for the ISS-2100 will be available for purchase and delivery directly from Honeywell. This will enable ISS-2100 customers to have access to six annual TAWS database updates.

The initial ISS-2100 TAWS database delivered by Honeywell will be available on September 27, 2023, as part of the 636 database release. This database will be approved by the Type II FAA Letter of Acceptance (LOA) Honeywell currently holds.

Action: On or after September 27, please go to ads.honeywell.com to set up the subscription purchase of the ISS-2100. Once logged-in, select Downloads and select the TerrDB (EGPWS) tab on the download screen. (Note: ISS-2100 subscription will not be available until September 27)

For account related inquiries please contact DSA@Honeywell.com, and for inquiries about database technical information please contact TerrDB@Honeywell.com.

Thank you,
Terrain Database Team
