COLLINS AEROSPACE NOTICE OF DATABASE REVISION

To: **Subscribers to the Fusion SVS Airport Runway Database**
From: **Aeronautical Data Services**

SUBJECT: Revision A of the Cycle 2503 Fusion SVS Airport Runway Database
                    Release Date: Friday, March 14, 2025

Overview
Revision A of the Cycle 2503 Fusion SVS Airport Runway Database has been posted to the portal.

Detail

An unexpected processing issue has resulted in an incorrect database file date to be displayed for the "Fusion SVS Airport Runway" database. The database content was correct, only the file names were affected. The issue has been resolved, and a revision-A ("REV-A") has been loaded to the Collins database portal. Due to the software used, "REV-A" cannot be added to the database file names, however "REV-A" will be present in the notification pop-up when extracting the database from the portal and on the portal notes to indicate the correct version to download.

If you have questions regarding this revision, the Aeronautical Data Services database technical team at collinsdatabasetech@rockwellcollins.com.

Future
It is not anticipated that there will be a future occurrence, although Collins will continue to monitor and evaluate its processes and notify customers as it becomes necessary. This Flight Alert is Database Alerts, Exclusions, and Certifications page.
