

25 September 2025

Cycle 2510-02

To: All ProLine 21 and PL21 Advanced SVS APT RWY Operators
From: Aeronautical Data Services Technical Support
SUBJECT: REVISION A of PL21 SVS APT-RWY Database

OVERVIEW

The ProLine 21 SVS Airport Runway database (PL21_SVS_Apt-Rwy.zip) has been determined to be unusable on ProLine 21 and PL21 Advanced platforms using Synthetic Vision Systems. A Revision of the database has been made available for download and should be loaded on your aircraft as soon as possible.

DETAIL

A processing issue within the latest delivery of Proline 21 SVS data (2510) prevents the FMS from completely loading into the FMS. Data loading will indicate a successful load at 100% but the status page will not populate.

A solution has been implemented and a revision to the affected database is now available on the Collins Database Portal for immediate download.

FUTURE

If you have questions regarding this Flight Alert, please contact Collins Aerospace, Aeronautical Data Services via email at CollinsDatabaseTech@Collins.com

WE URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE PERSONNEL
