

Falcon Cabin Management System (FCMS) Dealer Training

RCPN 523-0816146

Type of Course: Dealer Training*

Approximate Course Duration: 4 Hours

This course provides training to allow students to define the Falcon Cabin Management System (FCMS), identify components and functionality, and perform procedures related to the system's functional operations.

Upon completion of this course, the student will be able to:

1. Define FCMS.
2. Identify FCMS components and their functionality.
3. Set the Multi-Drop Secondary Bus (MDSB) address.
4. Troubleshoot the system.
5. Install the DiagClent software.
6. Perform a conformance and Digital Interface Box (DIB) check.
7. Force a download.

Price per Student: \$25.00*

***This course is limited to select Rockwell Collins Dealers or customers certifying for dealership status.**
