

Multiscan™ Weather Radar (WXR-2100) - Pilot

RCPN 523-0808188

Type of Course: Operator/Pilot Training

Approximate Course Duration: 2 Hours

This course provides training to familiarize pilots with the fundamentals of aviation weather detection and basic operation of the WXR-2100 MultiScan™ Fully Automatic Weather Radar System.

Upon completion of this course, the student will be able to:

1. Briefly describe the fundamentals of weather detection, including weather reflectivity, thunderstorm formation, turbulence detection, and windshear detection.
2. Describe the purpose of the various switches, knobs, and control settings on the Weather Radar Control Panels.
3. Describe the signification differences between Airbus and Boeing Control Panels.
4. Recognize Electronic Flight Information System (EFIS) display annunciations in the Manual and Automatic modes for Airbus and Boeing aircraft.
5. Describe operation of the WXR-2100 in the Manual and Automatic modes, including activation of System Test.

Price per Student: \$200.00*

***This price entitles the student to ninety (90) days of access to the training materials.**
