

INITIAL NOTICE:

Header: EU Advanced Manifest ICS2 Requirements (EORI), Effective March 1, 2023

This notice is to make you aware of new European Union (“EU”) Import Control System 2 (“ICS2”) requirements and to provide you with instructions on how to avoid potential shipment delays to Collins sites located in **the EU, Northern Ireland, Norway, and Switzerland (“EU + Others”)**.

Effective March 1, 2023, the EU has launched ICS2 for Freight Forwarder Air and Express Couriers, with a transition period available (for express couriers only) through October 1, 2023. Following the effective date (Oct 1 for express couriers, March 1 for all others), shipments entering or transiting through the EU + Others by air in postal, express, and general cargo consignments will be subject to complete pre-load and pre-arrival Entry Summary Declaration (“ENS”) data requirements.

Suppliers will be required to transmit the below data elements to their respective carriers, prior to departure in the originating country. Failure to do so will result in the goods not being loaded by the carrier. Items 1-7 are consistent with current requirements; however, **item 8 is new and will require additional action**.

1. Shipper/Sender Name
2. Shipper/Sender Address
3. Consignee Name
4. Consignee Address
5. Cargo Description (6-digit HS codes)
6. Total Quantity
7. Total Weight
8. **Consignee Economic Operator Registration Identification number (EORI)**

Suppliers shipping to a Collins site in the EU, N. Ireland, Norway, or Switzerland will now need to transmit the receiving site’s EORI to carriers.

How is the EORI transmitted to a carrier?

It is the Supplier’s responsibility to transmit all required data elements to their respective carrier(s). Many carriers have updated their systems to include a field for the receiving party’s EORI.

What happens if an EORI is not provided to a carrier?

If the necessary data is not made available prior to departure in the originating country, the goods will not be loaded by the carrier.

Where can I learn more about ICS2 and related requirements?

SUSTAINED MESSAGE:

Collins EU + Others Site EORI Numbers

Effective March 1, 2023*, per European Union (EU) Import Control System 2 (ICS2) requirements, shipments entering or transiting through the EU, Northern Ireland, Norway, and Switzerland (“EU + Others”) by air in postal, express, and general cargo consignments will need to include, among common standard fields like weight and HS Codes, the receiving party’s Consignee Economic Operator Registration Identification number (EORI). Supplier exporting to a Collins site located in the EU + Others, or transiting through one of these countries, must transmit the Collins site’s EORI to their respective carriers prior to departure in the originating country to avoid shipment delays.

**Transition period available (for express couriers only) through October 1, 2023*
