SUPPLIER CIRCULAR

“Supplier Gold” is the one, single United Technologies Corporation award bestowed upon a supplier to recognize performance excellence.

Items of Interest 166

Date: 5/17/2017

NOTE: This Supplier Circular has been generated specifically for suppliers who are currently manufacturing hardware with UTC Production Part Approval Process (UPPAP) requirements flowed down on purchase orders in accordance with ASQR-09.2

Per ASQR-09.2 Revision 01 Section 5.1 (h:)

- h. The Supplier shall obtain authorization via ASQR-09.2 Form 1 for Full or Interim Approval from the MFP before production parts are shipped. This does not negate or supersede other quality system requirements such as the FAIR.

In an effort to eliminate parts being shipped into UTAS where an approval has not been granted, a material inspection characteristic (MIC) has been established & added into SSI requiring DQRs to acknowledge that their company has achieved a minimum of Interim B UPPAP approval prior to completing an inspection lot (iLot) & shipping hardware to UTAS.

For DQRs who are completing inspection lots and come across this inspection characteristic, the following actions are required:

1. Confirm that your company has a UTAS signed ASQR-09.2 Form 1 on file for the associated part number/revision
2. If a valid approval exists, acknowledge “Pass” for this characteristic and continue with the completion of the iLot
3. If no approval exists, product shall be placed on hold and your UTAS Member Focal Point (MFP) should be contacted to understand what the status of UPPAP approval is for the corresponding part number(s)

If you believe UPPAP is not required on the parts your company is manufacturing and the MIC has inadvertently been added to the inspection plan, please submit a supplier request for information (SRI) requesting removal of the MIC from the iLot.

For more information, contact Michael Corsino at: michael.corsino@utas.utc.com

UTC Aerospace Systems / Hamilton Sundstrand Supplier Circulars cover items of interest, interpretation of drawings and specifications as well as clarifications of Hamilton Sundstrand procedures. In addition, they bring attention to examples of problems encountered by other suppliers and present their solutions for possible application in your organization. After review and appropriate action, file this circular for the future reference.
