

ITAR Definition, Requirement and Acknowledgement form.

Definition:

International Traffic in Arms Regulations (ITAR) is a set of United States government regulations that control the export and import of defense-related articles and services on the United States Munitions List (USML). These regulations implement the provisions of the Arms Export Control Act (AECA), and are described in Title 22 (Foreign Relations), Chapter I (Department of State), Subchapter M of the Code of Federal Regulations. The Department of State interprets and enforces ITAR. Its goal is to safeguard US national security and further US foreign policy objectives.

Requirement:

All US manufacturers (even if not engaging in an export), exporters, and brokers of defense articles, defense services, or related technical data, as defined on the USML, are required to register with US Department of State. Registration is primarily a means to provide the US Government with necessary information on who is involved in certain manufacturing and exporting activities. Registration does not confer any export rights or privileges, but is a precondition for the issuance of any license or other approval for export

For practical purposes, ITAR regulations dictate that information and material pertaining to defense and military related technologies (for items listed on the US Munitions List) may only be shared with US Persons unless authorization from the Department of State is received or a special exemption is used.

Survey:

ITAR Registered Yes ____ Expiration Date _____ No ____

Are you in the process of gaining registration Yes ____ No ____

Do you have a plan in place to register Yes ____ No ____

What is your current Business Classification – Circle one:
