

Airshow® MicroNet Support Discontinuance Bulletin

Summary

Due to evolving technologies and obsolescence of key hardware components, Rockwell Collins discontinued taking orders for the MicroNet family of cabin management components in 2007. Affected parts, listed in this bulletin, include the 102X and 17XX series audio-video distributors, the 100X, 101X, 103X, 105X, 106X and 1944 series controllers and the 1451 Smart Screen PC, as well as switch panels, remote controls and other MicroNet, Infinity and Integrated Cabin Management components.

Rockwell Collins will continue to provide commercially reasonable efforts to support the MicroNet family of parts until June 30, 2017. After this time, Rockwell Collins will discontinue support of the MicroNet family of parts. Customers are advised to take action before this discontinuance date.

Although there is no direct replacement for the MicroNet, Infinity or Integrated Cabin Management systems, upgrade packages are available to replace your cabin management system with our high-definition Venue™ cabin management system. Gulfstream owners and operators can refer to the Marketing Bulletin CSBRS-160520 for more information on Venue and the upgrade options. Cessna / Hawker and other VIP aircraft with a MicroNet system needing upgrade, can refer to the Marketing Bulletin BRS-110221.8.

Please contact your Rockwell Collins regional sales manager to discuss options, and for commercial and lead-time information.
