

Personal Computer Data Loading System (PCD-3000) and Database Unit (DBU-4001) Product Discontinuance

Ref. No. 2012-101M

Pub Date 12/2012

Effective as of the date of this marketing bulletin, Rockwell Collins is announcing the discontinuance of production of the PCD-3000 data loader and the DBU-4001 database unit. We will continue to provide repair services for the product on a parts available basis. Due to obsolete parts, we cannot guarantee all failed units will be repairable. In the event a failed unit is no longer repairable, Rockwell Collins can assist operators in obtaining a DBU-5000/5010E or a PDL-5001 as a suitable replacement, however wiring changes may be required to the aircraft.

The DBU-5000/5010E and PDL-5001 substantially reduce the time demands placed on flight department personnel and aircraft for periodic updates to the FMS and IFIS databases. The added ability to simultaneously load multiple units and databases further streamlines the update process. The DBU-5010E provides convenience and speed in uploading databases. For example, aircraft equipped with dual FMS can reduce data load times by as much as 50 percent over previous systems that required diskettes for each database load. By adding an IMS-3500 and the use of our Rockwell Collins Ascend Aircraft Information Manager (AIM) subscription service, the system will automatically and securely notify you via your smart device that database updates are queued and ready to securely upload. As an AIM subscriber, data can be transferred wirelessly (via Wi-Fi or cellular) on and off the aircraft anywhere in the world.

We believe these actions will minimize potential disruption to your aircraft operations. For further information on the Rockwell Collins DBU-5000/5010E or PDL-5001 or for assistance in planning your aircraft upgrade requirements, including spares and certification, please contact your Rockwell Collins Regional Sales Manager or Customer Account Administrator.

PCD-3000 – DISCONTINUED PART NUMBER

Equipment Type	Discontinued Part Number	Replacement Equipment Type	Replacement Part Number
PCD-3000	822-1631-004	DBU-5000/5010E ¹	Reference BRS Marketing Bulletin BRS-110091.3M
DBU-4001	622-9679-001	PDL-5001 ²	Reference BRS Marketing Bulletin 2012-098M

NOTES

- For more information on the DBU-5000/5010E, reference BRS-110091.3M Business and Regional Systems Marketing Bulletin – DBU-5000/5010E and PDL-5001. The DBU-5000/5010E may require wiring changes to the aircraft.
- For more information on the PDL-5001, reference 2012-098M Business and Regional Systems Marketing Bulletin – Portable Data Loader PDL-5001. The PDL-5001 may require power and grounding wiring to the aircraft.
