Ref. No. 2014-134M

Pub Date 09/2014

At Rockwell Collins, we appreciate your selection of our products for your aircraft, and strive to provide you with the best quality parts and service. Occasionally, advancements in the technologies we offer our customers or the availability of parts and components, necessitate that we cease production and phase out the support of older solutions. This is the case with the Electronic Flight Display (EFD) 870, and 871.

Effective September 1, 2014, Rockwell Collins is announcing the discontinuance of production on the Cathode Ray Tube (CRT) based Electronic Flight Display (EFD), specifically the EFD-870, and EFD-871. Rockwell Collins will continue to provide repair services for these products on a parts available basis.
