

Different Electronic Chart Databases for those with and without 200 Electronic chart limitation

There is a limitation where possible chart anomalies may occur when airports with greater than 200 charts are contained in a flight plan. New versions of software are being created that provide a solution to this issue. Therefore, Jeppesen will be providing two chart databases. One that will allow for airports with greater than 200 charts, and one that will not.

Please see below for the FSA part numbers not affected by this limitation and for general information on how to locate FSA part number.

To read more about the 200 Charts limitation please see 523-0824809

FSA Part numbers not affected by 200 Charts limitation:

810-0072-005
810-0072-006
810-0001-650
810-0001-675
810-0001-700
810-0001-750

For information about how to find your FSA part numbers, please see below:

Pro Line 21 Aircraft→File Server Configuration page

G280 Aircraft: MAINT MGR→System Config→IPSA-6000L

Global 5000/6000 Aircraft: OMS→System Config→IMA SW PN→IPSA-6000L or IPSA-6000R Global

7000/8000 Aircraft: OMS→System Config→IMA SW PN→IPC1.CCM 3 or IPC2.CCM 3

Legacy 450/500 Aircraft: OMS→System Config→IMA SW PN→IPC-LEFT/Slot 4
