

New to Collins Aerospace?

The following is a quick guide on how to get started understanding subscriptions, setting up subscription services, and accessing publications.

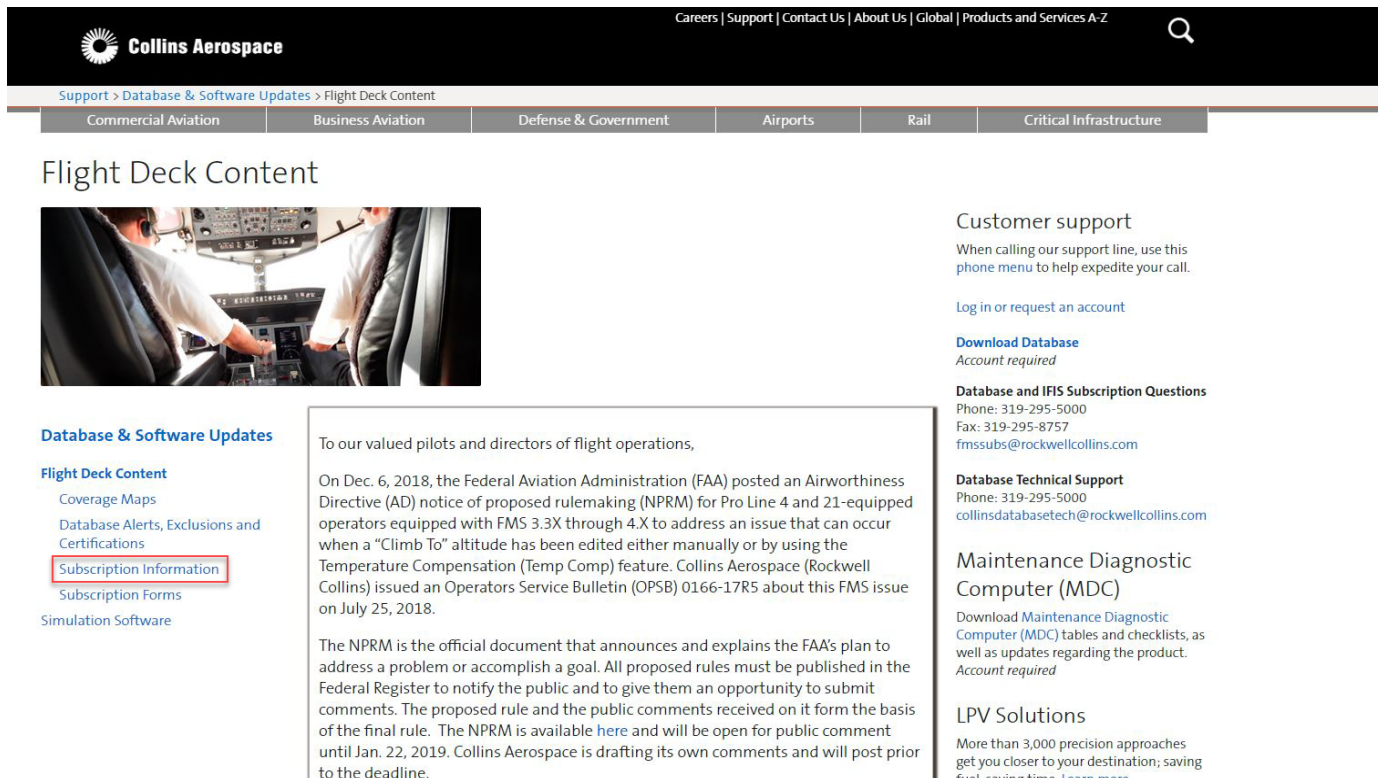

Table of Contents

A. Familiarize yourself with specific databases for your aircraft	2
B. Identify your XM Radio ID (if purchasing XM Graphical Weather)	4
C. Identify your SCID/HSCD number and Navigation Database (NDB) type	4
D. Use a coverage map to determine your NDB needs	7
E. Complete the forms to start your database subscription service	8
F. 3 rd party Service Providers for Jeppesen charts and/or graphical weather	9
G. Downloading databases from the Collins Aerospace Portal	9
H. Loading databases to the aircraft	10
I. Setting up IFIS Jeppesen Charts	10
J. Creating a publications account and accessing publications	11

NOTE: To help with understanding the steps below, a Bombardier Challenger 300 (Pro Line 21 with IFIS) with SCID number 832-4118-042, will be used as an example aircraft. Please ensure to select the information appropriate to your specific aircraft. **Any text below in blue will reference the information chosen for the example aircraft.**

A. Familiarize yourself with specific databases for your aircraft

1. Go to www.rockwellcollins.com/fms
2. Select **Subscription Information** link from the *Database and Software Updates* column on the left side (highlighted in red below).

The screenshot shows the Collins Aerospace website interface. At the top, there is a navigation bar with the Collins Aerospace logo and a search icon. Below the navigation bar, there is a breadcrumb trail: Support > Database & Software Updates > Flight Deck Content. A horizontal menu contains several categories: Commercial Aviation, Business Aviation, Defense & Government, Airports, Rail, and Critical Infrastructure. The main heading is "Flight Deck Content". On the left, there is a sidebar with the following links: Database & Software Updates, Flight Deck Content, Coverage Maps, Database Alerts, Exclusions and Certifications, **Subscription Information** (highlighted in red), Subscription Forms, and Simulation Software. The main content area features a photograph of pilots in a cockpit. Below the photo, there is a text block starting with "To our valued pilots and directors of flight operations," followed by a paragraph about an FAA Airworthiness Directive (AD) notice of proposed rulemaking (NPRM) for Pro Line 4 and 21-equipped operators. The text explains that the NPRM addresses a "Climb To" altitude issue and mentions the Temperature Compensation (Temp Comp) feature. It also states that Collins Aerospace issued an Operators Service Bulletin (OPSB) 0166-17R5 about this FMS issue on July 25, 2018. A second paragraph explains that the NPRM is the official document that announces and explains the FAA's plan to address a problem or accomplish a goal, and that it is available for public comment until Jan. 22, 2019. On the right side of the page, there are several sections: "Customer support" with a phone menu link, "Log in or request an account", "Download Database" (Account required), "Database and IFIS Subscription Questions" with contact information (Phone: 319-295-5000, Fax: 319-295-8757, fmssubs@rockwellcollins.com), "Database Technical Support" with contact information (Phone: 319-295-5000, collinsdatabasetech@rockwellcollins.com), "Maintenance Diagnostic Computer (MDC)" with a link to download MDC tables and checklists, and "LPV Solutions" with a link to learn more.

3. Under *New user information and instructions*, select **Pro Line 4_21 - Flight Database Services** to learn more about the subscription options for aircraft equipped with Pro Line 4 or Pro Line 21.

Example: Bombardier Challenger 300 would select Pro Line 4_21 - Flight Database Services

4. For Pro Line Fusion equipped aircraft, select a specific aircraft type to determine subscriptions available. Select **Pro Line Fusion- Flight Database Services** for a detailed description of the databases.

B. Identify your XM Radio ID (if purchasing XM Graphical Weather)

1. To purchase an XM Graphical Weather subscription, the XM Radio ID will need to be identified. Later in this process (See **Section F**), the Radio ID will be needed to set up a subscription with the XM Weather Service Provider.

For Pro Line 21 users, follow this procedure to determine your Radio ID: [Identifying XM Receiver ID ProLine 21](#)

For Pro Line Fusion users, refer to your aircraft's Pro Line Fusion Operator's Guide for instructions on locating the Radio ID.

C. Identify your SCID/HSCD number and Navigation Database (NDB) type

1. In order to determine what type Navigation Database is needed, the SCID/HSCD number will need to be identified.

Use this procedure to determine the SCID/HSCD # for Pro Line 4 or Pro Line 21 users: [PL 21 Navigation Database and SCID Identification](#)

For Pro Line Fusion users, navigate to <https://portal.rockwellcollins.com/web/support-self-service/self-help-articles> for instructions specific to finding the HSCD # in your aircraft type.

2. Once the SCID/HSCD # has been identified, navigate back to www.rockwellcollins.com/fms. Select the **Subscription Information** link again under *Database and Software Updates*.

To our valued pilots and directors of flight operations,

Rockwell Collins announced that Thursday, Dec. 14, 2017 (Cycle 1713 Revision A), we are reinstating the approximately 10,000 flight management system (FMS) navigation database procedures that were removed as a result of the FMS temperature compensation issues first described in our operator's bulletin [OPSB 0166-17](#).

We have released an updated operator's bulletin, OPSB 0166-17R4 detailing a limitation of FMS versions 3.3.X through 4.X and the actions to which operators must immediately be aware and comply. Please note that changing "Climb to" altitudes in departures and missed approaches and the FMS temperature

D. Use a coverage map to determine your NDB needs

1. Navigate to www.rockwellcollins.com/fms and select the link for **Coverage Maps** under *Database and Software Updates*. Use this to explore the different coverage maps based on the type NDB needed (i.e. Type 4, Type 5, Type 6, etc.)

Example: For a CL-300 using a Type 7 database that operates only inside the U.S. and Canada, the appropriate choice would be either a Jeppesen or Lufthansa Type 7 AMERICAS coverage region.

2. Select the link applicable to your aircraft.

For Pro Line 4 and Pro Line 21 users, select the link titled **Navigation Database** under *Business & Regional- Pro Line 4/21*. For all other users (including Pro Line Fusion), select the link applicable to your aircraft.

Example: For a CL-300 aircraft with Pro Line 21 I would select the Navigation Database link under Business & Regional- Pro Line 4/21.

F. 3rd party Service Providers for Jeppesen charts and/or graphical weather

1. To have Jeppesen electronic charts for your aircraft, you must download a subscribed charting database through the Jeppesen website. Please contact Jeppesen at 1-800-553-7750 or ba-customerservice@jeppesen.com to set up a subscription.
2. To have XM Graphical Weather services, you can download the database through the Collins Aerospace database portal (similar to your Navigation Database). In addition, you must create an XM Subscription with the service provider. Please contact XM Weather at 1-800-985-9200, and have your Radio ID available (see **Section B** of this document).

G. Downloading databases from the Collins Aerospace Portal

1. Navigate to www.rockwellcollins.com/fms. Login in or create an account using the **Log in or request an account** link on the right hand side under *Customer Support*.
2. Then select the **Download Database** link once you are logged in.

3. Use the following link for instructions on downloading databases to a USB Flash Drive: [Database Web Download](#) (PDF) or [Database Download Instructions](#) (Video)

H. Loading databases to the aircraft

1. Determine what type of data loader is on the aircraft and use one of the following links for instructions on how to load databases.

CPAS-3000 users: [CPAS Installation Guide](#)

PCD-3000 users: [PCD Installation Guide](#)

DBU-5000/5010E users: [Non-IFIS Data Loading](#) or [IFIS Data Loading](#)

Pro Line Fusion users: [Fusion Data Loading](#)

I. Setting up IFIS Jeppesen Charts

1. After successfully setting up the Jeppesen charts subscription by contacting Jeppesen, (see **Section F**) and downloading the Jeppesen charts database from the Jeppesen JDM portal, the last step will be to finish setting up the IFIS Jeppesen charts on the aircraft. First, obtain the Subscription number (VNX #) and/or any 10-character Region Codes (access codes) from Jeppesen.

2. Next, use the following procedure to configure the chart information.

For Pro Line 21 IFIS users: [IFIS Chart Subscription Setup](#)

For Pro Line Fusion users: [Entering Jeppesen Subscription Code And Checking Operation of Jeppesen Charts](#) (Video)

NOTE: Questions regarding specific subscription services, or regarding databases that are available on the Collins Aerospace portal, please contact the FMS Subscriptions Group at (319) 295-5000 Option 3, or via email at fmssubs@rockwellcollins.com, Monday through Friday from 7:30 AM CST to 4:30 PM CST.

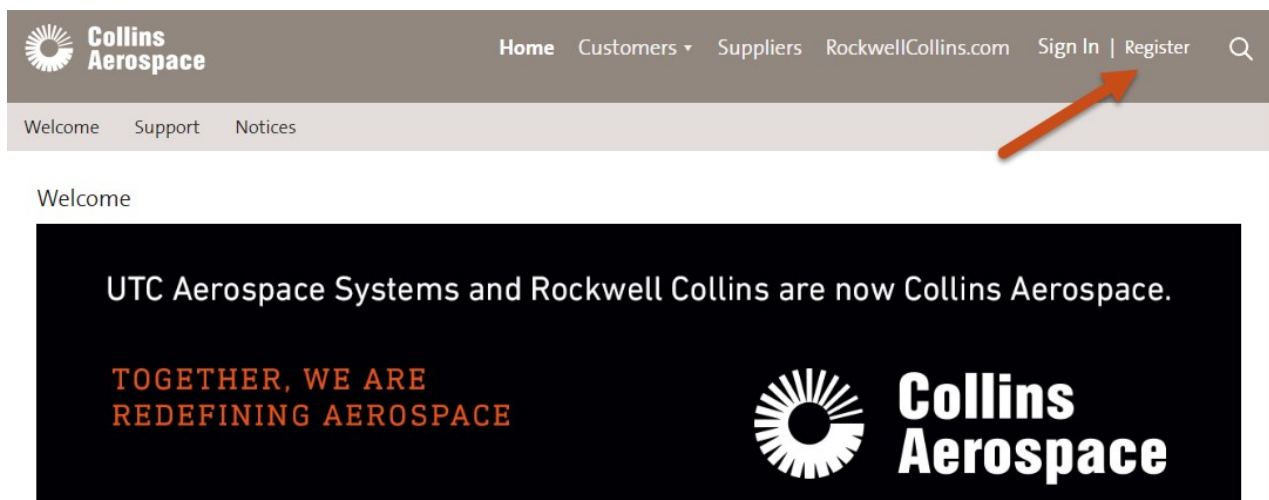

For technical questions regarding the above procedures, please contact Collins Aerospace Avionics Support at (319) 295-5000 Option 1, Option 1, or by email at avionicssupport@rockwellcollins.com.

J. Creating a publications account and accessing publications

To gain access to Technical Publications through Collins Aerospace, please visit:

[Portal.RockwellCollins.com](https://portal.rockwellcollins.com)

Upon selecting Register, you will be prompted to enter detailed information in regards to your account request.

The screenshot shows the top navigation bar of the Collins Aerospace website. On the left is the Collins Aerospace logo. The navigation menu includes links for Home, Customers (with a dropdown arrow), Suppliers, RockwellCollins.com, Sign In, and Register. A search icon is located on the far right. Below the navigation bar, there are links for Welcome, Support, and Notices. A red arrow points to the Register link. Below the navigation bar, the word "Welcome" is displayed. A large black banner contains the text "UTC Aerospace Systems and Rockwell Collins are now Collins Aerospace." followed by the slogan "TOGETHER, WE ARE REDEFINING AEROSPACE" in orange and the Collins Aerospace logo.
