Subject: Rockwell Collins Removing 35% of Approaches Cycle 1712

Dear Valued Customer,

This email is to inform you that beginning with the 1712 AIRAC Data Cycle, approximately 10,000 approaches (~35%) will be removed from navigation database types 6, 7 and 8. This will require you to verify your procedures prior to flight planning.

A complete list of procedures excluded can be found at the following link:

[http://www.rockwellcollins.com/Services\\_and\\_Support/Database\\_and\\_Software\\_Updates/Navigation\\_Databases/Database\\_Alerts\\_and\\_Certifications.aspx](http://www.rockwellcollins.com/Services_and_Support/Database_and_Software_Updates/Navigation_Databases/Database_Alerts_and_Certifications.aspx)

We apologize for the inconvenience the removal of these approaches will cause. Please know that we are working to restore these approaches as quickly as we can and will provide more information prior to the release of cycle 1713.

Further details on the issue can be found at the following link:
