525-542	Starz Super Pack

Some channels may not be available due to the aircraft location and/or weather conditions.

DirecTV RDU

**Rockwell
Collins**

FOR THE UNITED STATES

DIRECTV RECEIVER REACTIVATION

When the Tailwind system has been in the hangar or outside the DIRECTV coverage area for an extended period of time you may need to perform a re-activation “hit” to receive programming.

To reactivate the programming service, first make sure that the aircraft is within the U.S. footprint with favorable weather conditions. Power up the Tailwind system and initialize the aircraft’s altitude reference system. Make sure that the antenna has a clear line of sight to the DIRECTV satellite by tuning each receiver to a preview channel and observing the preview channel video.

- If the receiver does not display the preview channel on the cabin monitor, another problem may exist. An activation “hit” will not clear this condition.

Call the Rockwell Collins Customer Support Center (CSC) at (319) 295-5000, Option 1 with your company name, aircraft type, and serial number, and request “reactivation.” Typical reactivation take about ten minutes, after which time television programs are received normally.

If the Tailwind system loses a programming channel, contact the flight crew. Rockwell Collins updates authorized satellite services, programs and channel numbers periodically. If additional information is required, contact the CSC at (319) 295-5000, Option 1 with the program name and channel number.

Building trust every day.

Rockwell Collins delivers innovative aviation and high-integrity solutions that transform commercial and government customers’ futures worldwide. Backed by a global network of service and support, we are deeply committed to putting our solutions to work for you, whenever and wherever you need us. In this way, working together, we build trust. Every day.
